

Trend Micro™

ScanMail™ Suite for Microsoft® Exchange™

High security. Low administration. Real-time protection.

Malicious web links are the #1 email threat today—far more common than malware attachments. And yet most enterprise mail servers don't have the web security to stop these attacks. At the same time, spear phishing is a growing threat that too often succeeds in tricking employees with targeted messages containing bad links. These carefully crafted emails don't resemble spam so they can slip past filters, leaving companies defenseless.

Trend Micro™ ScanMail™ for Microsoft® Exchange™ is the only mail server security solution today that blocks emails containing malicious web links. By utilizing real-time web, file and email threat intelligence, ScanMail stops rapidly evolving and targeted attacks immediately—before they reach your users.

High performance scan engines filter the wide range of known threats—without slowing mail delivery. Plus optional Data Loss Prevention (DLP) performs content filtering based on customizable DLP templates that simplify data protection and compliance.

KEY FEATURES

Leading Malware and Spam Protection

- Detects and removes viruses, spyware, Trojans, and worms
- Stops zero-day threats faster with cloud-based security
- Employs pattern matching, heuristics, and real-time cloud queries to block spam and phishing

Data Loss Prevention (optional module)

- Protects data and simplifies compliance with policy-based content filtering
- Speeds setup and increases accuracy with customizable compliance templates and 35+ regional identifiers
- Enables granular Active Directory-based policy enforcement
- Reduces management time and facilitates audits with detailed reporting

Low Administration

- Cuts admin time in half compared to Microsoft® Forefront™, proven in independent tests¹
- Streamlines group configuration and management with intuitive interface, centralized logging and reporting
- Prevents unauthorized policy changes with role-based access control

Unique Web Reputation Technology

- Blocks emails with malicious links—a capability offered by no other vendor
- Speeds protection using real-time queries to threat intelligence in the cloud
- Scans links embedded inside email attachments in addition to links within emails

Email Reputation Technology

- Stops mail from bad or suspicious senders—without relying on content inspection
- Delivers immediate protection based on real-time threat intelligence in the cloud
- Drops, on average, 85% of all incoming email, freeing network resources

Optimized for Exchange

- Speeds throughput—averaging 57% faster performance than Microsoft Forefront²
- Avoids duplicative inspection with AV Stamp multi-threaded scanning and CPU throttling
- Supports latest Microsoft Exchange versions with native 64-bit support
- Integrates with Microsoft® System Center Operations Manager and Outlook® Junk E-mail Filter

SOFTWARE

Protection Points

- Mail Server
- Internal inspection
- Inbound and outbound

Threat Protection

- Antivirus
- Web Threat Protection
- Antispyware
- Antispam
- Antiphishing
- Content Filtering

KEY BENEFITS

Comprehensive Mail Security

Blocks the wide range of spam, malware, and blended threats

Web Threat Protection

Checks embedded URLs in real-time to block the leading email threat

Immediate Protection

Protects against rapidly evolving attacks with cloud-based security intelligence

Lower IT Costs

Minimizes administrative headaches with strong central management

Higher Performance

Scans efficiently with negligible impact on server performance

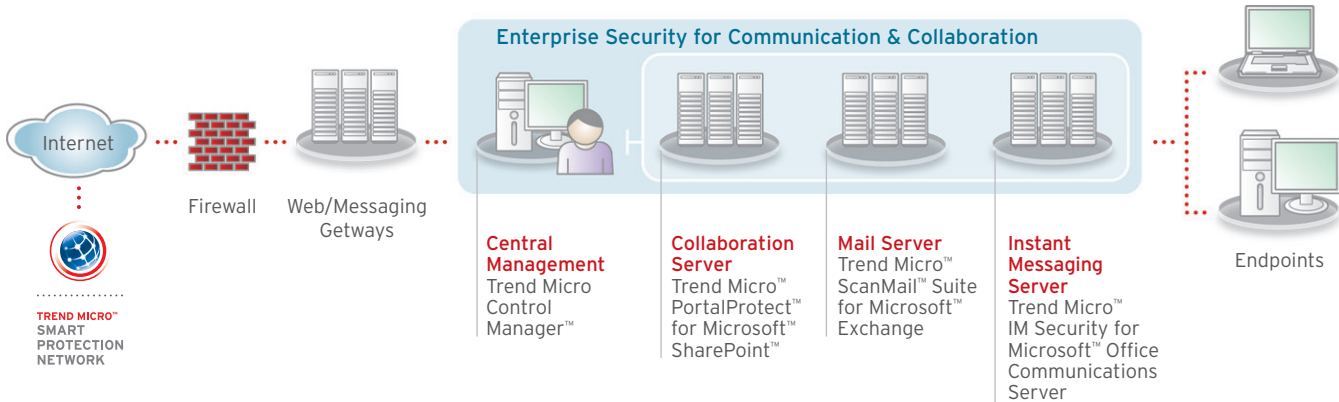

Simplifies Data Protection and Compliance

Easy to use data loss prevention technology discovers compliance-related data and blocks violations

Trend Micro™ Enterprise Security for Communication & Collaboration integrates ScanMail Suite with three other powerful solutions—for comprehensive protection of your Microsoft email, IM, and collaboration environments. The unique cloud-client security model and correlated threat intelligence of the Trend Micro™ Smart Protection Network™ deliver immediate protection across all three environments. Centralized management, optimized performance, and tight platform integration reduce IT costs and minimize risk.

Trend Micro Communication & Collaboration Security delivers an airtight, four-in-one defense against the wide range of threats at multiple points and attack vectors.

Minimum System Requirements for ScanMail	
Hardware	
<ul style="list-style-type: none"> • 1GB RAM, 2GB RAM recommended (5MB of RAM per mailbox) • 2GB of free disk space 	
Windows Operating System	
<ul style="list-style-type: none"> • Microsoft Windows® 2000 server with SP4 or above • Microsoft Windows 2003 server SP1 or above • Microsoft Windows Server 2003 R2 (32-bit or 64-bit) • Microsoft Windows Server 2008 (64-bit) 	
Exchange Platforms	
<ul style="list-style-type: none"> • Microsoft Exchange 2003 Server SP 2 • Microsoft Exchange 2007 Server • Microsoft Exchange 2010 Server • Microsoft Exchange 2010 SP1 Server 	
Additional Requirements	
<ul style="list-style-type: none"> • Microsoft IIS 6.0 or above • JVM™ version J2RE 1.4.1_02 • Any Java™-enabled web browser that supports frames, such as Microsoft Windows Internet Explorer® 6.0 or above • Firefox® 3.0 or above • Use of Email Reputation Service (included) requires deployment of a Microsoft Exchange Edge role; enterprises that have already deployed a Trend Micro messaging gateway security solution, would not need ERS with ScanMail 	

TREND MICRO™ ENTERPRISE SECURITY

Trend Micro™ Enterprise Security is a tightly integrated offering of content security products, services and solutions powered by the Trend Micro Smart Protection Network™. Together they deliver maximum protection from emerging threats while minimizing the cost and complexity of security management.

“Content filtering rules allowed us to prevent social security numbers or credit card numbers from being accidentally sent out in emails. The new templates in the latest release of ScanMail have made it easy for us to further protect our reputation.”
