

Trend Micro™

NeatSuite™ Advanced

Multilayered, Multi-threat Protection

Today's businesses face a staggering number of malware threats driven by a dramatic rise in profit-driven Internet crime. On average, more 2,000 new, unique malware threats hit the Internet every hour¹, challenging security administrators to maintain timely protection across the organization.

NeatSuite Advanced meets this challenge with a fully integrated, centrally managed security suite that delivers up-to-the-minute protection while reducing management complexity. It protects your Internet gateway, mail servers, file servers, storage systems, desktops and laptops from web threats and other malware. NeatSuite Advanced scales to meet the needs of your organization by offering extensive configuration options, maximum administrative efficiency, and support for the broadest range of operating systems among leading content security vendors.

NeatSuite Advanced is powered by the Trend Micro™ Smart Protection Network™, Trend Micro's industry-leading core technology infrastructure. It leverages in-the-cloud threat intelligence that correlates more than 5 billion email, web and file queries daily to provide immediate and automatic threat protection.

KEY FEATURES

Fully Integrated, Gateway-to-Endpoint Enterprise Security Suite

- Includes automated malware and spyware cleanup of clients, including rootkits
- Improves productivity by stopping spam and fraudulent phishing-related emails
- Supports regulatory compliance and corporate governance with content filtering of email and attachments
- Reduces risks and costs by dramatically reducing the time to acquire, deploy, and manage content security

Designed for the Enterprise Network Environment

- Provides broad operating system support for heterogeneous enterprise environments
- Tightly integrated with leading solutions for network infrastructure and enterprise applications, including those from Microsoft, Cisco, and IBM Lotus
- Supports large multi-site networks with enterprise-class scalability, configurability, and multi-tier management structure

Industry-leading Protection via Smart Protection Network

- Leverages unique in-the-cloud web, email and file threat intelligence
- **New!** File Reputation reduces reliance on conventional pattern files for protection from the latest threats
- Correlates threat intelligence across threat vectors so that if one element receives a bad reputation, all components of the attack are blocked
- Blocks the latest threats before they reach you, preventing them from impacting your network and damaging your business

Web-based Centralized Management Console

- Manages security infrastructure with centralized administration for security updates, patch deployment, coordinated response, and remote management
- Provides robust, enterprise-wide graphical reporting
- Delivers enterprise-wide monitoring and visibility into security status

SOFTWARE & SERVICES

Protection Points

- Gateway
- Mail servers
- File servers
- Storage systems
- Clients

Threat Protection

- Inappropriate content
- Spam and phishing attacks
- Spyware, rootkits, and bots
- Viruses and Trojans
- Web threats
- Worms and network attacks

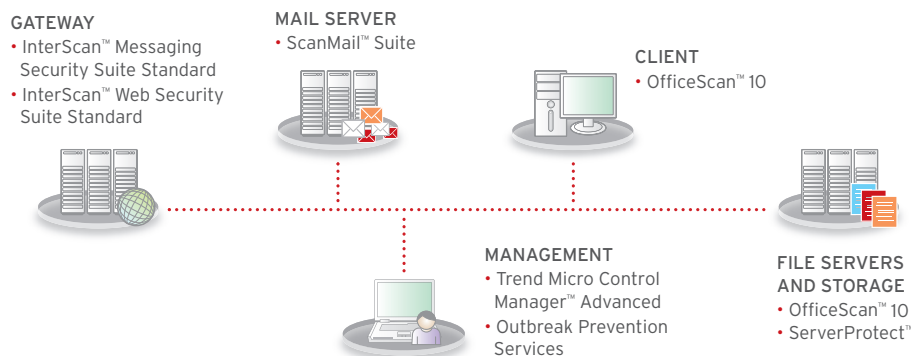

KEY BENEFITS

- Reduces risk with comprehensive multilayered, multi-threat protection
- Delivers immediate protection with in-the-cloud threat intelligence
- Provides unparalleled protection against web-borne threats by blocking access to malicious sites
- Offers enterprise-class scalability and configurability
- Lowers IT costs with maximum administrative efficiency

Trend Micro™ Enterprise Security

Trend Micro's enterprise-wide security solution integrates multiple layers of products and services, delivering seamless inter-product collaboration to ensure maximum protection at critical network entry points. Powered by our unique in-the-cloud Trend Micro™ Smart Protection Network™, our solutions continually receive up-to-the minute threat intelligence—so you are protected immediately. And with centralized management of enterprise-wide security, it minimizes complexity.

SUPPORT FOR DIVERSE ENTERPRISE ENVIRONMENTS	
Multilayered Protection	Platform Coverage
Gateway	
InterScan Messaging Security Suite (Standard) InterScan Web Security Suite (Standard)	Windows® Linux® Solaris®
Mail Server	
ScanMail™ Suite for Microsoft® Exchange ScanMail™ Suite for Lotus™ Domino™ ScanMail™ for Lotus™ Domino™	Windows Windows, Linux on x86, Solaris AIX, i5OS//OS/400 zOS, Linus on zSeries
File Server and Storage	
OfficeScan™ ServerProtect™ for Windows®/Novell NetWare ServerProtect™ for Linux™ ServerProtect™ for NetApp™ ServerProtect™ for EMC™ Celerra™	Windows Windows, Novell NetWare Linux NetApp Filer EMC Celerra
Client	
OfficeScan™	Windows
Management	
Trend Micro Control Manager™ (Advanced) Outbreak Prevention Services	Windows Windows

NEATSUITE ADVANCED ADD-ON OPTIONS

Expand your protection with the following add-on security modules—for security tailored to the needs of your environment.

Target Protection	Add-On Security	Advantage
Collaboration Server	>> PortalProtect™	Protects SharePoint collaboration systems
Endpoint	Plug-ins for OfficeScan 10: >> Intrusion Defense Firewall	• Delivers proactive HIPS and vulnerability shielding
	>> Mobile Security	• Safeguards data and applications on smartphones and PDAs
	• Core Protection for Virtual Machines (Avail. 2H '09)	• Manages security agents on virtual machines for optimized scan performance and low impact on the host system
	• Security for Macintosh (Avail. 2H '09)	• Protects Macintosh clients from malware and prevents them from accessing malicious web sites
Messaging Gateway	>> Upgrade to InterScan Messaging Security Suite Advanced (gateway spam prevention)	Stops spam at the gateway
Web Gateway	>> Upgrade to InterScan Web Security Suite Advanced (URL filtering)	Filters and blocks inappropriate web content
Enterprise Support	>> Premium Support	Personalized, proactive support
