## Protect Your Students, Your Faculty, and Your Reputation

### With Trend Micro, **Your IT Team Just Got Bigger**

Keeping your students, faculty, and administrative staff connected to the critical tools and information they need can be especially challenging as you face continually shrinking budgets. To meet the constant demand to do more with less, you have to invest in cost-effective IT solutions that help simplify the complexity of your K-12 or higher education IT infrastructure.

Traditionally, educational institutions deployed point solutions to address individual aspects of their overall security concerns and an unpredictable threat landscape. But addressing multi-dimensional security and compliance concerns with one-dimensional, disparate solutions can create a disjointed security infrastructure. This makes it not only difficult and expensive to manage, but results in solution redundancies and often leaves your school vulnerable to hidden security gaps.

#### **EFFECTIVE, EFFICIENT, AND EASY-TO-MANAGE IT SECURITY**

Trend Micro simplifies IT security deployment and management for public and private educational institutions by providing comprehensive security and data protection solutions that work together to:

- Strike the balance between providing open, safe, and secure Internet access
- Safeguard your school's environment from external and internal attacks
- Keep servers, desktops, and laptops – whether on or off the network - free from threats such as viruses, spyware, and spam, as well as new web-based malware
- Maintain the integrity of your school's faculty and student data with message archiving and data leak prevention solutions
- Protect faculty and students from the financial damage caused by online scams and phishing attacks
- Stay compliant with government regulations and institutional policies

Trend Micro security solutions are designed with the costs and efficiency-conscious needs of K-12 and higher education institutions in mind. They are easy to install, easy to manage, and easy to update. Partnering with Trend Micro enables your IT team to accomplish much more than it could on its own. With Trend Micro, your IT team just got bigger.

Trend Micro solutions are powered by the Trend Micro Smart Protection Network, which correlates threat intelligence and the collective knowledge of Trend Micro's global customer base so that customers receive immediate protection against the latest threats. This distinctive ability not only provides you unparalleled security strength, but it enables you to recognize greater levels of efficiency to optimize your time and money.

#### **END-TO-END PROTECTION**

**Shakopee Schools**  
Shakopee, MN

“ Trend Micro solutions add up to an effective multilayered design for security. The end-to-end approach for protection gives us a lot of confidence, and is a flexible framework for adjusting to changes that are inevitable in this business. ”

**Wade Phillips**  
Director of Technology

#### **LOWER TCO FOR IT SECURITY**

**Appleton Area School District**  
Appleton, WI

“ Overall, with the high level of efficiency and automation afforded by NeatSuite™, we can spend more of our time on other priority items, which further lowers the total cost of ownership of this comprehensive solution. ”

**Jack Smrekar**  
Network Administrator

### SCALABLE, ENTERPRISE-STRENGTH SECURITY FOR YOUR SCHOOL

From the gateway to the server to the data point, Trend Micro offers your school a comprehensive array of enterprise-strength security solutions that integrate and scale to meet the varied and changing needs of your growing campus. Additionally, tight integration with Microsoft and Cisco technologies enables you to leverage your existing investments in those vendors' solutions.

From multilayered and multi-threat protection suites to email archiving and data leak prevention, Trend Micro provides you on-premise security solutions and hosted services that enable you to:

- Simplify complex network and data security problems to reduce IT operating costs and administration efforts while eliminating security gaps
- Save time and optimize resources with easy-to-manage and automated threat prevention, protection and clean up
- Take advantage of 24x7 protection for your institution with award-winning and industry-proven solutions and services
- Ensure that you stay protected now and in the future with integrated, scalable and configurable components

### TREND MICRO - LEADER IN INFORMATION SECURITY AND DATA PROTECTION

When you invest in information security and data protection solutions, you need a security partner who has the experience, expertise, and reputation you can trust. You need a partner that gives you confidence so you and your team can worry less about security, and focus more on projects that show your value to the organization.

As a trusted IT security expert for more than 20 years, Trend Micro has consistently been recognized for its superior security offerings, including:

- #1 in gateway antivirus for seven consecutive years (IDC)
- #1 in antispam (Radicati)
- #1 in Email Reputation Services (Opus One)
- Largest correlated reputation database

Partner with Trend Micro and discover how integrated security solutions can **protect your students, your faculty, and your reputation, and make your IT team feel bigger.**
