

Trend Micro™

Worry-Free™ Business Security Agent v7.0

System Requirements

Worry-Free Business Security Advanced & Standard

The following table describes the minimum requirements for each Worry-Free Business Security component.

Notes:

- The Worry-Free Business Security Agent supports Citrix Presentation Server™ 4.0/4.5/5.0 and Remote Desktop.
- WFBS 6.0 supports VMware® ESX™ 3.0/3.5.

SECURITY SERVER

Processor:

- Conventional scan mode: Intel™ Pentium™ 4 or higher
- Smart Scan mode: Multiple processors or multi-core processor

Memory:

- Smart Scan mode: 1GB; 2GB recommended
- Conventional mode(x86): 512MB; 1GB recommended
- X64 (Smart and Conventional): 1GB; 2GB recommended
- Windows EBS 2008 or Windows SBS 2008 (Smart and Conventional): 4GB

Disk space:

- 6GB total disk space (excludes SA and MSA disk usage)
- 3GB for installation; 3GB for operation

Operating System:

- Windows XP: Professional Edition with SP3, Media Center 2005 Edition with SP3
- Windows Vista: Ultimate with SP1 or SP2, Enterprise with SP1 or SP2, Business with SP1 or SP2, Home Premium with SP1 or SP2, Home Basic with SP1 or SP2
- Windows 7: Ultimate (no service pack or with SP1), Enterprise (no service pack or with SP1), Professional (no service pack or with SP1), Home Premium (no service pack or with SP1), Home Basic (no service pack or with SP1), Note: Windows 7 Starter edition is not supported
- Windows Server 2003: Web Edition with SP1 or SP2, Standard Edition with SP1 or SP2, Enterprise Edition with SP1 or SP2, Datacenter Edition with SP1 or SP2
- Windows Small Business Server (SBS) 2003: SP1 or SP2
- Windows Storage Server 2003: No service pack
- Windows SBS 2003 R2: Web Edition with SP1 or SP2, Standard Edition with SP1 or SP2, Enterprise Edition with SP1 or SP2, Datacenter Edition with SP1 or SP2
- Windows Home Server: No service pack or Power Pack 1 or 3
- Windows Server 2008: Standard Edition (no service pack or SP2), Enterprise Edition (no service pack or SP2), Datacenter Edition (no service pack or SP2)
- Windows SBS 2008: Standard Edition (no service pack or SP2), Premium Edition (no service pack or SP2)
- Windows Essential Business Server (EBS) 2008: Standard Edition (no service pack or SP2), Premium Edition (no service pack or SP2)
- Windows Storage Server 2008: No service pack
- Windows Server 2008 R2: Foundation Edition (no service pack or SP1(RC)), Standard Edition (no service pack or SP1(RC)), Enterprise Edition (no service pack or SP1(RC)), Datacenter Edition (no service pack or SP1(RC))

- Windows Small Business Server 7 Beta: No Service Pack
- Windows Small Business Server V2 Beta: No Service Pack

Notes:

Windows Server 2008 and 2008 R2 installations that use the Server Core option are not supported. All major editions and 64-bit versions of the listed operating systems are supported unless noted otherwise. Basic coverage in Windows SBS 7 and Windows Home Server V2, full support to be released in WFBS7 Service Pack.

Web Server:

- Microsoft™ Internet Information Server (IIS) 6.0 (Windows Server 2003, SBS 2003, or Home Server)
- IIS 7.0 (Windows Server 2008, SBS 2008, or EBS 2008)
- IIS 7.5 (Windows Server 2008 R2)

Notes:

IIS is not supported on Windows XP or Windows Vista/7. Apache must be used on these operating systems.

If you already have an Apache server installed, Trend Micro recommends uninstalling it. An appropriate Apache server will be installed together with the Security Server.

Management Console:

- Web browser: Internet Explorer 6.0 SP2 or later (32-bit only)
- PDF reader: Adobe™ Acrobat™ Reader 6.0 or later
- Display: High-color display with a resolution of 1024x768 pixels or higher

SECURITY AGENT

Processor:

- Intel Pentium™ x86 or compatible processor
- x64 processor supporting AMD64 and Intel EM64T technologies
- Clock speed requirements vary depending on the operating system:
- 1GHz (Windows Server 2008, SBS 2008, or EBS 2008)
- 800MHz (Windows Vista, Windows 7)
- 450MHz (Windows XP, Server 2003, SBS 2003, or Home Server)

Memory:

- 4GB (SBS/EBS 2008)
- 1GB minimum; 2GB recommended (Windows Server 2003 or 2008)
- 512MB minimum; 1GB recommended (Windows Vista, Windows 7)
- 512MB minimum; 1GB recommended (Windows Server 2003, or Home Server)
- 256MB minimum; 512MB recommended (Windows XP)

Disk space:

- Smart Scan: 500MB total disk space (300MB for installation, 200MB for operation)
- Conventional Scan: 1GB total disk space (400MB for installation, 600MB for operation)

Operating System:

- The Security Agent supports all operating systems supported by the Security Server. In addition to these operating systems, the Security Agent also supports:
- Windows XP Home PC (SP3)
- Windows XP Tablet (SP3)

Web browser (for web-based setup):

- Internet Explorer 6.0 SP2 or later

Display:

- 256-color display or higher with resolutions of 800x600 pixels or higher

MESSAGING SECURITY AGENT

Processor:

- 1GHz Intel Pentium x86 or compatible processor
- 1GHz x64 processor supporting AMD64 and Intel EM64T technologies

Memory:

- 1GB

Disk space:

- 2GB total disk space (500MB for installation, 1.5GB for operation)

Operating System:

- Windows Server 2003 R2 (with Storage Server 2003), SP1 or SP2
- Windows Server 2003 (with Storage Server 2003), SP1 or SP2
- Windows SBS 2003 R2, SP1 or SP2
- Windows SBS 2003, SP1 or SP2
- Windows Server 2008, SP1 or SP2
- Windows Server 2008 R2, SP1 or SP2
- Windows SBS 2008, SP1 or SP2
- Windows EBS 2008, SP1 or SP2

Note:

All major editions and 64-bit versions of these operating systems are supported unless noted otherwise.

Web Server:

- IIS 6.0 (Windows Server 2003, SBS 2003 or Home Server)
- IIS 7.0 (Windows Server 2008, SBS 2008, or EBS 2008)
- IIS 7.5 (Windows Server 2008 R2)

Mail Server:

- Exchange Server 2003 SP2 or above. Exchange 2007 SP1 or above, and Exchange 2010

Note:

To integrate properly with the anti-spam features in Exchange Server 2003 and 2007, the Messaging Security Agent requires the Intelligent Message Filter on these versions of Exchange Server.
